

API Connection Guide

**Connect your data sources securely and start receiving weekly
Signal Briefings.**

· Submit your credentials ·

API Connection Guide

This guide helps you generate a Read-Only API key to sync your platform with our analysis engine.

Shopify

- Settings > Apps & Sales Channels.
- Click **Develop apps**.
- Configure **Admin API integration**.
- Enable **Read Access** for Orders & Analytics.
- Install app & copy **Access Token (shpat_)**

GA4 (Google Analytic 4)

- **Property ID:** Search "Property settings" in the top bar. Copy the 9-digit Property ID (e.g. 123456789).
- **Access:** Add **info@nekopulse.com** as **Viewer** in **Property Management**.

Providing your Property ID is required to unlock Traffic & Retention signals. Without it, your weekly briefing will include sales data only.

Stripe

- Developers > **API keys**.
- Create **Restricted key**.
- Name it "NekoPulse Read-Only".
- Set **Read** for Charges & Balance.
- Copy key (starts with **rk_**).

Final Step: Submission

Once you have your credentials ready, please submit them using your personal activation link sent by email.

Reply to this email with a screenshot and we'll resolve it within 24 hours info@nekopulse.com

Once verified, your data will begin to flow into our analysis engine.
