CSV Submission Guide

To maintain the aesthetic integrity and precision of your Signal Briefing, please use our official template.

To make the process seamless, we automatically handle your Brand ID and timestamps, so you can focus exclusively on your business performance metrics.

Section 1: Visual Data Reference (The Core Metrics)

Growth & Revenue:

- **churn_count / churn_mrr:** Total customer departures and the associated revenue loss.
- **upg_mrr:** Incremental revenue gained from plan upgrades.

Power User Insights:

- **pu_count / pu_usage:** Number of high-engagement users and their average activity score (0-100).
- **pu_mrr / pu_churn:** Revenue contribution and churn rate specific to your Power User segment.

Product Momentum:

- **feat_ret_u / ret7_now:** Feature retention and Day 7 retention rates (use decimals, e.g., 0.75).
- **dau_now / stick_now:** Daily Active Users and Stickiness ratio (**DAU/MAU**).
- **rev_now / rev_d:** Total weekly revenue and the variance (+/-) from the previous period.

Data Mapping & CSV Submission

Section 2: The "Golden Rules" for Submission

- **Use numbers only.** Do not include currency symbols (\$/€), commas for thousands, or percentage signs (%).
- **Use a dot for decimals.** Never use a comma as a decimal separator.
- **Do not leave empty cells.** If a metric does not apply this week, enter 0.
- **Keep the CSV structure unchanged.** Do not rename, add, remove, or reorder any columns.
- **Fill in Row 2 only.** Row 1 must remain exactly as provided.

Ready to send?

Once your CSV is ready, return to your **welcome email** and open your personal activation link to upload it securely.

Section 3: Sample Row (Visual Example)

Your completed CSV row should look like this:

25450,215000,45,2,9850,85.20,1.2,185,112,450,22.5,18.4

rev_now	pu_mrr	pu_count	churn_count	churn_mrr	aov_now	refund_rate	new_cust	ret_cust	dau_now	stick_now	ret7_now
25450	215000	45	2	9850	85.20	1.2	185	112	450	22.5	18.4

Data Dictionary & Formatting Guide

Metric (Header)	What it represents	Where to find it (Sources)
rev_now	Total Revenue: Total gross sales in the last 30 days.	Shopify: Analytics > Reports > Sales / Stripe: Dashboard Overview
pu_mrr	Paid MRR: Monthly Recurring Revenue from active subscriptions.	Stripe: Billing > Analytics > MRR
pu_count	Active Customers: Number of unique customers with an active order.	Shopify: Customers (Filter: Active) / Stripe: Active Subscriptions
churn_count	Customer Churn: Users who cancelled or stopped buying this month.	Stripe: Analytics > Churn / Shopify: App-specific churn reports
churn_mrr	Revenue Lost: The dollar value of the subscriptions lost this month.	Stripe: Revenue Recovery > Churn MRR
aov_now	Average Order Value: The average amount spent per transaction.	Shopify: Analytics > Overview > Average order value
refund_rate	Return Rate: Percentage of orders refunded (use decimals).	Shopify: Analytics > Reports > Finances > Payments
new_cust	New Customers: Total count of first-time buyers this period.	Shopify: Analytics > First-time vs returning customer sales
ret_cust	Returning Customers: Total count of repeat buyers.	Shopify: Analytics > Returning customer rate
dau_now	Daily Active Users: Average unique visitors per day.	GA4: Reports > Engagement > Overview
stick_now	Stickiness: Engagement depth (DAU divided by Monthly Users).	GA4: Reports > Retention > User engagement
ret7_now	Day 7 Retention: Percentage of users who return after 7 days.	GA4: Reports > Retention > Retention cohorts
